Agency’s plan to increase participation of small minority-, women- and veteran-owned firms:

Currently Washington State Lottery identifies available vendors in WEBS by commodity code and county, we submit all our solicitations using this criterion to ensure all vendors, certified or not are included in the process; we provide a link to the OMWBE website from our website; all our solicitation documents provide information regarding OMWBE.

Future inclusion includes: attending any locally available “Get Certified” events; distributing a letter to current vendors notifying them of advantages of certification with OMWBE and where they can find out more.
