Agency's plan to increase participation of small minority-, women- and veteran-owned firms:

The WHRC continues to review businesses and office supply vendors that meet the requirements as a small minority, women and veteran owned firms. In 2017 the WHRC may have a need for technology support and would consider a business meeting these needs to contract through. The WHRC has only two contacts at the current time that are with WSU to perform necropsies on euthanized equines and Truesdail Laboratories to conduct drug testing on equine samples. This does not present the agency with the opportunity to utilize small business. Most other expenses are paid for by using the agency purchase card as they are generally small assets and supplies.
