Agency’s plan to increase participation of small minority-, women- and veteran-owned firms:

The Washington Student Achievement Council’s participation level for FY16 is at 8.07%. While performing above the current state average, we intend to continue our best practices and make efforts to increase our participation percentages as outlined by Governor Inslee’s strategic framework and the Results Washington goal of 16% participation rate. Our agency has identified the following strategies in 2017 to make progress towards this goal: We will provide information to individuals that contact our agency for future contracting possibilities in order to encourage full participation; consistently provide information regarding contracting opportunities available through our agency to OMWBE for website publication and promotion; and finally, attend OMWBE events and promote the businesses we currently utilize.
