 - (2) When DSHS determines that the funding insufficiency is resolved, it will give Contractor written notice to resume performance.  - a. In the event a bona fide dispute concerning a question of fact arises between DSHS and the Contractor that cannot be resolved between the parties, either party may initiate the dispute resolution procedure provided herein.
 - b. The initiating party shall reduce its description of the dispute to writing and deliver it to the responding party. The responding party shall respond in writing within three (3) Business Days (which shall mean Monday through Friday, 8:00 a.m. to 5:00 p.m., Pacific Time, except for holidays observed by the state of Washington). - c. The Contractor waives its immunity under Title 51 RCW to the extent it is required to indemnify, defend, and hold harmless the State and its agencies, officials, agents, or employees.
- d. Nothing in this term shall be construed as a modification or limitation on the Contractor's obligation to procure insurance in accordance with this Contract or the scope of said insurance.

If the Contractor fails to provide industrial insurance coverage or fails to pay premiums or penalties on behalf of its employees, as may be required by law, Agency may collect from the Contractor the full amount payable to the Industrial Insurance accident fund. The Agency may deduct the amount owed by the Contractor to the accident fund from the amount payable to the Contractor by the Agency under this contract, and transmit the deducted amount to the Department of Labor and Industries, (L&I) Division of Insurance Services. This provision does not waive any of L&I's rights to collect from the Contractor.

27. Limitation of Liability.

General Terms and Conditions

- a. The Parties agree that neither the Contractor nor DSHS shall be liable to each other, regardless of the form of action, for consequential, incidental, indirect, or special damages except a claim related to bodily injury or death, or a claim or demand based on patent, copyright, or other intellectual property right infringement, in which case liability shall be as set forth elsewhere in this Contract.
- b. This section does not modify any sections or any other conditions as are elsewhere agreed to herein between the parties. The following are not considered consequential, incidental, indirect, or special damages as the term is used in the foregoing section.

- c. Neither party shall be liable for personal injury to the other party or damage to the other party's property except personal injury or damage to property proximately caused by such party's respective fault or negligence.

28. Notice of Overpayment. If the Contractor receives a Contractor overpayment notice or a letter communicating the existence of an overpayment from DSHS, the Contractor may protest the overpayment determination by requesting an adjudicative proceeding. The Contractor's request for an adjudicative proceeding must:

- a. Be *received* by the Office of Financial Recovery (OFR) at Post Office Box 9501, Olympia, Washington 98507-9501, within twenty-eight (28) calendar days of service of the notice;

- d. Include a copy of the overpayment notice.

Timely and complete requests will be scheduled for a formal hearing by the Office of Administrative Hearings. The Contractor may be offered a pre-hearing or alternative dispute resolution conference in an attempt to resolve the overpayment dispute prior to the hearing.

Failure to provide OFR with a written request for a hearing within twenty-eight (28) days of service of a Contractor overpayment notice or other overpayment letter will result in an overpayment debt against the Contractor. DSHS may charge the Contractor interest and any costs associated with the collection of this overpayment. DSHS may collect an overpayment debt through lien, foreclosure, seizure and sale of the Contractor's real or personal property; order to withhold and deliver; or any other collection action available to DSHS to satisfy the overpayment debt.

29. Ownership/Rights in Data.

- a. Both Custom Services and Commercial Off-The-Shelf material that is delivered under this Contract, but that does not originate therefrom ("Preexisting Material"), shall be transferred to DSHS with a nonexclusive, royalty-free, irrevocable license to publish, translate, reproduce, deliver, perform, display, and dispose of such Preexisting Material, and to authorize others to do so except that such license shall be limited to the extent to which Contractor has a right to grant such a license. The Contractor shall exert all reasonable effort to advise DSHS at the time of delivery of Preexisting Material furnished under this Contract, of all known or potential infringements of publicity, privacy or of intellectual property contained therein and of any portion of such document which was not produced in the performance of this Contract. The Contractor agrees to obtain, at its own expense, express written consent of the copyright holder for the inclusion of Preexisting Material. DSHS shall receive prompt written notice of each notice or claim of copyright infringement or infringement of other intellectual property right worldwide received by the Contractor with respect to any Preexisting Material delivered under this Contract. DSHS shall not have the right to modify or remove any restrictive markings placed upon the Preexisting Material by the Contractor.

The Contractor is hereby commissioned to create the Work Product. Ownership includes the right to copyright, patent, register and the ability to transfer these rights and all information used to formulate such Work Product.
 - (2) If for any reason the Work Product would not be considered a work made for hire under applicable law, the Contractor assigns and transfers to DSHS the entire right, title and interest in and to all rights in the Work Product and any registrations and copyright applications relating thereto and any renewals and extensions thereof.
 - (3) The Contractor shall execute all documents and perform such other proper acts as DSHS may deem necessary to secure for DSHS the rights pursuant to this section.
 - (4) The Contractor shall not use or in any manner disseminate any Work Product to any third party, or represent in any way Contractor ownership in any Work Product, without the prior written permission of DSHS. The Contractor shall take all reasonable steps necessary to ensure that its agents, employees, or Subcontractors shall not copy or disclose, transmit or perform any Work Product or any portion thereof, in any form, to any third party.

Contractor hereby warrants and represents to DSHS that Contractor is the owner of the Software licensed hereunder or otherwise has the right to grant to DSHS the licensed rights to the Software provided by Contractor through this Contract without violating

General Terms and Conditions

any rights of any third party worldwide.

- (2) The Contractor represents and warrants that Contractor has the right to license the Software to DSHS as provided in this Contract and that DSHS' use of the Software and documentation within the terms of this Contract will not infringe upon any copyright, patent, trademark, or other intellectual property right worldwide or violate any third party's trade secret, contract, or confidentiality rights worldwide.
- (3) The Contractor represents and warrants that: (i) Contractor is not aware of any claim, investigation, litigation, action, suit or administrative or judicial proceeding pending or threatened based on claims that the Software infringes any patents, copyrights, or trade secrets of any third party, and (ii) that Contractor has no actual knowledge that the Software infringes upon any patents, copyrights, or trade secrets of any third party.

30. Patent and Copyright Indemnification.

- a. The Contractor, at its expense, shall defend, indemnify, and hold DSHS harmless from and against any claims against DSHS that any Product or Work Product supplied hereunder, or DSHS's use of the Product or Work Product within the terms of this Contract, infringes any patent, copyright, utility model, industrial design, mask work, trade secret, trademark, or other similar proprietary right of a third party worldwide. Product shall mean any Contractor-supplied equipment, Software, or documentation. The Contractor shall pay all costs of such defense and settlement and any penalties, costs, damages and attorneys' fees awarded by a court or incurred by DSHS provided that DSHS:
 - (1) Promptly notifies the Contractor in writing of the claim, but DSHS's failure to provide timely notice shall only relieve the Contractor from its indemnification obligations if and to the extent such late notice prejudiced the defense or resulted in increased expense or loss to the Contractor; and
 - (2) Cooperates with and agrees to use its best efforts to encourage the Office of the Attorney General of Washington to grant the Contractor sole control of the defense and all related settlement negotiations.
- b. If such claim has occurred, or in the Contractor's opinion is likely to occur, DSHS agrees to permit the Contractor, at its option and expense, either to procure for DSHS the right to continue using the Product or Work Product or to replace or modify the same so that they become non-infringing and functionally equivalent. If use of the Product or Work Product is enjoined by a court and the Contractor determines that none of these alternatives is reasonably available, the Contractor, at its risk and expense, will take back the Product or Work Product and provide DSHS a refund. In the case of Work Product, the Contractor shall refund to DSHS the entire amount DSHS paid to the Contractor for the Contractor's provision of the Work Product. In the case of Product, the Contractor shall refund to DSHS its depreciated value. No termination charges will be payable on such returned Product, and DSHS will pay only those charges that were payable prior to the date of such return. Depreciated value shall be calculated on the basis of a useful life of four (4) years commencing on the date of purchase and shall be an equal amount per year over said useful life. The depreciation for fractional parts of a year shall be prorated on the basis of three hundred sixty-five (365) days per year. In the event the Product has been installed less than one (1) year, all costs associated with the initial installation paid by DSHS shall be refunded by the Contractor.
- c. The Contractor has no liability for any claim of infringement arising solely from:
 - (1) The Contractor's compliance with any designs, specifications or instructions of DSHS;

General Terms and Conditions

(2) Modification of the Product or Work Product by DSHS or a third party without the prior knowledge and approval of the Contractor; or

(3) Use of the Product or Work Product in a way not specified by the Contractor;

unless the claim arose against the Contractor's Product or Work Product independently of any of these specified actions.

d. This Section, *Patent and Copyright Indemnification*, is intended to survive the expiration or termination of the agreement.

- 31. Public Records Act.** The Contractor acknowledges that DSHS is subject to the Public Records Act (Chapter 42.56 RCW) and that this Contract is a public record as defined in Chapter 42.56 RCW. 9. Change order Process

a. Definitions

- (1) **Change Request** means a request in written form, submitted by either Party to the existing contract, to modify, delete, or add, in whole or in part, to the Deliverables or services of the contract, made in accordance with and within the scope of the original contract.
- (2) **Change Order** means a response in written form to a Change Request, which is mutually agreed to in writing and signed by both parties to the existing contract, that modifies, deletes, or adds, in whole or in part, to the Deliverables or services in the existing contract, and that is made in accordance with and within the scope of the original contract.

b. Change Request/Change Order Process

A Change Request may be submitted by either party, to the other party, to modify, delete, or add, in whole or in part, the deliverables or services of this Contract, if made in accordance with and within the scope of this Contract. Once the Change Request is mutually agreed to by both parties, it should be documented in a final written Change Order and signed by both parties.

The Change Order Process shall not be used for: changes affecting an increase or decrease in the maximum dollar value of the original contract; a change to the Contract End Date of the original Contract; a substantial change beyond the original scope of the solicitation and this resulting Contract; or any changes to the terms and conditions of this Contract. Such changes shall be made via contract amendment or through the procurement of a new contract, as appropriate.

Either party may submit a Change Request using Contractor's Change Management Request Process form to include at a minimum the following:

- (1) A statement as to why the change is needed;
- (2) Proposed cost increases and decreases, itemized by Deliverable;
- (3) Schedule impacts;

Special Terms and Conditions

- (4) Details of the number of Contractor staff hours by level or skill set needed for the change; and
- (5) Details of the number of DSHS staff hours needed to effect the change.

DSHS Contract Manager or designee and the Contractor's Project Director or designee as set out in the Contract or as subsequently identified in writing to DSHS, are charged with managing the negotiation of the Change Request. The above listed persons are also charged with signing the final Change Request and the resulting Change Order.

The signed Change Order becomes part of the Contract and dictates the way in which work is being performed by both parties.

10. Order of Precedence

The documents listed below are hereby incorporated into this Contract by reference. In the event of an inconsistency, the inconsistency shall be resolved by giving precedence in the following order:

1. Applicable federal and Washington state laws and regulations;
2. General Terms & Conditions and Special Terms & Conditions contained in this Contract and terms contained in Exhibit A - Data Security Requirements;
3. Terms & Conditions as contained in any other additional Exhibits or Attachments to this Contract;
4. DSHS Solicitation RFP #2123-778 including any and all Exhibits or Attachments;
5. Contractor's bids to the DSHS Solicitation RFP #2123-778 (Contractor's Proposal);
6. Any other provisions of this Contract incorporated by reference or otherwise.

Exhibit A – Data Security Requirements Exhibit

Exhibit A – Data Security Requirements

1. **Definitions.** The words and phrases listed below, as used in this Exhibit, shall each have the following definitions:
 - a. “AES” means the Advanced Encryption Standard, a specification of Federal Information Processing Standards Publications for the encryption of electronic data issued by the National Institute of Standards and Technology (<http://nvlpubs.nist.gov/nistpubs/FIPS/NIST.FIPS.197.pdf>).
 - b. “Authorized Users(s)” means an individual or individuals with a business need to access DSHS Confidential Information, and who has or have been authorized to do so.
 - c. “Business Associate Agreement” means an agreement between DSHS and a contractor who is receiving Data covered under the Privacy and Security Rules of the Health Insurance Portability and Accountability Act of 1996. The agreement establishes permitted and required uses and disclosures of protected health information (PHI) in accordance with HIPAA requirements and provides obligations for business associates to safeguard the information.
 - d. “Category 4 Data” is data that is confidential and requires special handling due to statutes or regulations that require especially strict protection of the data and from which especially serious consequences may arise in the event of any compromise of such data. Data classified as Category 4 includes but is not limited to data protected by: the Health Insurance Portability and Accountability Act (HIPAA), Pub. L. 104-191 as amended by the Health Information Technology for Economic and Clinical Health Act of 2009 (HITECH), 45 CFR Parts 160 and 164; the Family Educational Rights and Privacy Act (FERPA), 20 U.S.C. §1232g; 34 CFR Part 99; Internal Revenue Service Publication 1075 (<https://www.irs.gov/pub/irs-pdf/p1075.pdf>); Substance Abuse and Mental Health Services Administration regulations on Confidentiality of Alcohol and Drug Abuse Patient Records, 42 CFR Part 2; and/or Criminal Justice Information Services, 28 CFR Part 20.
 - e. “Cloud” means data storage on servers hosted by an entity other than the Contractor and on a network outside the control of the Contractor. Physical storage of data in the cloud typically spans multiple servers and often multiple locations. Cloud storage can be divided between consumer grade storage for personal files and enterprise grade for companies and governmental entities. Examples of consumer grade storage would include iTunes, Dropbox, Box.com, and many other entities. Enterprise cloud vendors include Microsoft Azure, Amazon Web Services, and Rackspace.
 - f. “Encrypt” means to encode Confidential Information into a format that can only be read by those possessing a “key”; a password, digital certificate or other mechanism available only to authorized users. Encryption must use a key length of at least 256 bits for symmetric keys, or 2048 bits for asymmetric keys. When a symmetric key is used, the Advanced Encryption Standard (AES) must be used if available.
 - g. “FedRAMP” means the Federal Risk and Authorization Management Program (see www.fedramp.gov), which is an assessment and authorization process that federal government agencies have been directed to use to ensure security is in place when accessing Cloud computing products and services.
 - h. “Hardened Password” means a string of at least eight characters containing at least three of the following four character classes: Uppercase alphabetic, lowercase alphabetic, numeral, and special characters such as an asterisk, ampersand, or exclamation point.
 - i. “Mobile Device” means a computing device, typically smaller than a notebook, which runs a mobile operating system, such as iOS, Android, or Windows Phone. Mobile Devices include smart phones, most tablets, and other form factors.

Exhibit A – Data Security Requirements Exhibit

- j. “Multi-factor Authentication” means controlling access to computers and other IT resources by requiring two or more pieces of evidence that the user is who they claim to be. These pieces of evidence consist of something the user knows, such as a password or PIN; something the user has such as a key card, smart card, or physical token; and something the user is, a biometric identifier such as a fingerprint, facial scan, or retinal scan. “PIN” means a personal identification number, a series of numbers which act as a password for a device. Since PINs are typically only four to six characters, PINs are usually used in conjunction with another factor of authentication, such as a fingerprint.
 - k. “Portable Device” means any computing device with a small form factor, designed to be transported from place to place. Portable devices are primarily battery powered devices with base computing resources in the form of a processor, memory, storage, and network access. Examples include, but are not limited to, mobile phones, tablets, and laptops. Mobile Device is a subset of Portable Device.
 - l. “Portable Media” means any machine readable media that may routinely be stored or moved independently of computing devices. Examples include magnetic tapes, optical discs (CDs or DVDs), flash memory (thumb drive) devices, external hard drives, and internal hard drives that have been removed from a computing device.
 - m. “Secure Area” means an area to which only authorized representatives of the entity possessing the Confidential Information have access, and access is controlled through use of a key, card key, combination lock, or comparable mechanism. Secure Areas may include buildings, rooms or locked storage containers (such as a filing cabinet or desk drawer) within a room, as long as access to the Confidential Information is not available to unauthorized personnel. In otherwise Secure Areas, such as an office with restricted access, the Data must be secured in such a way as to prevent access by non-authorized staff such as janitorial or facility security staff, when authorized Contractor staff are not present to ensure that non-authorized staff cannot access it.
 - n. “Trusted Network” means a network operated and maintained by the Contractor, which includes security controls sufficient to protect DSHS Data on that network. Controls would include a firewall between any other networks, access control lists on networking devices such as routers and switches, and other such mechanisms which protect the confidentiality, integrity, and availability of the Data.
 - o. “Unique User ID” means a string of characters that identifies a specific user and which, in conjunction with a password, passphrase or other mechanism, authenticates a user to an information system.
2. **Authority.** The security requirements described in this document reflect the applicable requirements of Standard 141.10 (<https://ocio.wa.gov/policies>) of the Office of the Chief Information Officer for the state of Washington, and of the DSHS Information Security Policy and Standards Manual. Reference material related to these requirements can be found here: <https://www.dshs.wa.gov/ffa/keeping-dshs-client-information-private-and-secure>, which is a site developed by the DSHS Information Security Office and hosted by DSHS Central Contracts and Legal Services.
3. **Administrative Controls.** The Contractor must have the following controls in place:
- a. A documented security policy governing the secure use of its computer network and systems, and which defines sanctions that may be applied to Contractor staff for violating that policy.
 - b. If the Data shared under this agreement is classified as Category 4, the Contractor must be aware of and compliant with the applicable legal or regulatory requirements for that Category 4 Data.

Exhibit A – Data Security Requirements Exhibit

- c. If Confidential Information shared under this agreement is classified as Category 4, the Contractor must have a documented risk assessment for the system(s) housing the Category 4 Data.

4. Authorization, Authentication, and Access. In order to ensure that access to the Data is limited to authorized staff, the Contractor must:

- a. Have documented policies and procedures governing access to systems with the shared Data.
- b. Restrict access through administrative, physical, and technical controls to authorized staff.
- c. Ensure that user accounts are unique and that any given user account logon ID and password combination is known only to the one employee to whom that account is assigned. For purposes of non-repudiation, it must always be possible to determine which employee performed a given action on a system housing the Data based solely on the logon ID used to perform the action.
- d. Ensure that only authorized users are capable of accessing the Data.
- e. Ensure that an employee's access to the Data is removed immediately:
 - (1) Upon suspected compromise of the user credentials.
 - (2) When their employment, or the contract under which the Data is made available to them, is terminated.
 - (3) When they no longer need access to the Data to fulfill the requirements of the contract.
- f. Have a process to periodically review and verify that only authorized users have access to systems containing DSHS Confidential Information.
- g. When accessing the Data from within the Contractor's network (the Data stays within the Contractor's network at all times), enforce password and logon requirements for users within the Contractor's network, including:
 - (1) A minimum length of 8 characters, and containing at least three of the following character classes: uppercase letters, lowercase letters, numerals, and special characters such as an asterisk, ampersand, or exclamation point.
 - (2) That a password does not contain a user's name, logon ID, or any form of their full name.
 - (3) That a password does not consist of a single dictionary word. A password may be formed as a passphrase which consists of multiple dictionary words.
 - (4) That passwords are significantly different from the previous four passwords. Passwords that increment by simply adding a number are not considered significantly different.
- h. When accessing Confidential Information from an external location (the Data will traverse the Internet or otherwise travel outside the Contractor's network), mitigate risk and enforce password and logon requirements for users by employing measures including:
 - (1) Ensuring mitigations applied to the system don't allow end-user modification.
 - (2) Not allowing the use of dial-up connections.

Exhibit A – Data Security Requirements Exhibit

- (3) Using industry standard protocols and solutions for remote access. Examples would include RADIUS and Citrix.
 - (4) Encrypting all remote access traffic from the external workstation to Trusted Network or to a component within the Trusted Network. The traffic must be encrypted at all times while traversing any network, including the Internet, which is not a Trusted Network.
 - (5) Ensuring that the remote access system prompts for re-authentication or performs automated session termination after no more than 30 minutes of inactivity.
 - (6) Ensuring use of Multi-factor Authentication to connect from the external end point to the internal end point.
- i. Passwords or PIN codes may meet a lesser standard if used in conjunction with another authentication mechanism, such as a biometric (fingerprint, face recognition, iris scan) or token (software, hardware, smart card, etc.) in that case:
- (1) The PIN or password must be at least 5 letters or numbers when used in conjunction with at least one other authentication factor
 - (2) Must not be comprised of all the same letter or number (11111, 22222, aaaaa, would not be acceptable)
 - (3) Must not contain a “run” of three or more consecutive numbers (12398, 98743 would not be acceptable)
- j. If the contract specifically allows for the storage of Confidential Information on a Mobile Device, passcodes used on the device must:
- (1) Be a minimum of six alphanumeric characters.
 - (2) Contain at least three unique character classes (upper case, lower case, letter, number).
 - (3) Not contain more than a three consecutive character run. Passcodes consisting of 12345, or abcd12 would not be acceptable.
- k. Render the device unusable after a maximum of 10 failed logon attempts.

5. Protection of Data. The Contractor agrees to store Data on one or more of the following media and protect the Data as described:

- a. **Hard disk drives.** For Data stored on local workstation hard disks, access to the Data will be restricted to Authorized User(s) by requiring logon to the local workstation using a Unique User ID and Hardened Password or other authentication mechanisms which provide equal or greater security, such as biometrics or smart cards.
- b. **Network server disks.** For Data stored on hard disks mounted on network servers and made available through shared folders, access to the Data will be restricted to Authorized Users through the use of access control lists which will grant access only after the Authorized User has authenticated to the network using a Unique User ID and Hardened Password or other authentication mechanisms which provide equal or greater security, such as biometrics or smart cards. Data on disks mounted to such servers must be located in an area which is accessible only to authorized personnel, with access controlled through use of a key, card key, combination lock, or comparable mechanism.

Exhibit A – Data Security Requirements Exhibit

For DSHS Confidential Information stored on these disks, deleting unneeded Data is sufficient as long as the disks remain in a Secure Area and otherwise meet the requirements listed in the above paragraph. Destruction of the Data, as outlined below in Section 8 Data Disposition, may be deferred until the disks are retired, replaced, or otherwise taken out of the Secure Area.

- c. **Optical discs (CDs or DVDs) in local workstation optical disc drives.** Data provided by DSHS on optical discs which will be used in local workstation optical disc drives and which will not be transported out of a Secure Area. When not in use for the contracted purpose, such discs must be Stored in a Secure Area. Workstations which access DSHS Data on optical discs must be located in an area which is accessible only to authorized personnel, with access controlled through use of a key, card key, combination lock, or comparable mechanism.
- d. **Optical discs (CDs or DVDs) in drives or jukeboxes attached to servers.** Data provided by DSHS on optical discs which will be attached to network servers and which will not be transported out of a Secure Area. Access to Data on these discs will be restricted to Authorized Users through the use of access control lists which will grant access only after the Authorized User has authenticated to the network using a Unique User ID and Hardened Password or other authentication mechanisms which provide equal or greater security, such as biometrics or smart cards. Data on discs attached to such servers must be located in an area which is accessible only to authorized personnel, with access controlled through use of a key, card key, combination lock, or comparable mechanism.
- e. **Paper documents.** Any paper records must be protected by storing the records in a Secure Area which is only accessible to authorized personnel. When not in use, such records must be stored in a Secure Area.
- f. **Remote Access.** Access to and use of the Data over the State Governmental Network (SGN) or Secure Access Washington (SAW) will be controlled by DSHS staff who will issue authentication credentials (e.g. a Unique User ID and Hardened Password) to Authorized Users on Contractor's staff. Contractor will notify DSHS staff immediately whenever an Authorized User in possession of such credentials is terminated or otherwise leaves the employ of the Contractor, and whenever an Authorized User's duties change such that the Authorized User no longer requires access to perform work for this Contract.
- g. **Data storage on portable devices or media.**
 - (1) Except where otherwise specified herein, DSHS Data shall not be stored by the Contractor on portable devices or media unless specifically authorized within the terms and conditions of the Contract. If so authorized, the Data shall be given the following protections:
 - (a) Encrypt the Data.
 - (b) Control access to devices with a Unique User ID and Hardened Password or stronger authentication method such as a physical token or biometrics.
 - (c) Manually lock devices whenever they are left unattended and set devices to lock automatically after a period of inactivity, if this feature is available. Maximum period of inactivity is 20 minutes.
 - (d) Apply administrative and physical security controls to Portable Devices and Portable Media by:
 - i. Keeping them in a Secure Area when not in use,

Exhibit A – Data Security Requirements Exhibit

- ii. Using check-in/check-out procedures when they are shared, and
 - iii. Taking frequent inventories.
- (2) When being transported outside of a Secure Area, Portable Devices and Portable Media with DSHS Confidential Information must be under the physical control of Contractor staff with authorization to access the Data, even if the Data is encrypted.
- h. Data stored for backup purposes.**
- (1) DSHS Confidential Information may be stored on Portable Media as part of a Contractor's existing, documented backup process for business continuity or disaster recovery purposes. Such storage is authorized until such time as that media would be reused during the course of normal backup operations. If backup media is retired while DSHS Confidential Information still exists upon it, such media will be destroyed at that time in accordance with the disposition requirements below in Section 8 *Data Disposition*.
 - (2) Data may be stored on non-portable media (e.g. Storage Area Network drives, virtual media, etc.) as part of a Contractor's existing, documented backup process for business continuity or disaster recovery purposes. If so, such media will be protected as otherwise described in this exhibit. If this media is retired while DSHS Confidential Information still exists upon it, the data will be destroyed at that time in accordance with the disposition requirements below in Section 8 *Data Disposition*.
- i. Cloud storage.** DSHS Confidential Information requires protections equal to or greater than those specified elsewhere within this exhibit. Cloud storage of Data is problematic as neither DSHS nor the Contractor has control of the environment in which the Data is stored. For this reason:
- (1) DSHS Data will not be stored in any consumer grade Cloud solution, unless all of the following conditions are met:
 - (a) Contractor has written procedures in place governing use of the Cloud storage and Contractor attests in writing that all such procedures will be uniformly followed.
 - (b) The Data will be Encrypted while within the Contractor network.
 - (c) The Data will remain Encrypted during transmission to the Cloud.
 - (d) The Data will remain Encrypted at all times while residing within the Cloud storage solution.
 - (e) The Contractor will possess a decryption key for the Data, and the decryption key will be possessed only by the Contractor and/or DSHS.
 - (f) The Data will not be downloaded to non-authorized systems, meaning systems that are not on either the DSHS or Contractor networks.
 - (g) The Data will not be decrypted until downloaded onto a computer within the control of an Authorized User and within either the DSHS or Contractor's network.
 - (2) Data will not be stored on an Enterprise Cloud storage solution unless either:
 - (a) The Cloud storage provider is treated as any other Sub-Contractor, and agrees in writing to all of the requirements within this exhibit; or,

Exhibit A – Data Security Requirements Exhibit

(b) The Cloud storage solution used is FedRAMP certified.

(3) If the Data includes protected health information covered by the Health Insurance Portability and Accountability Act (HIPAA), the Cloud provider must sign a Business Associate Agreement prior to Data being stored in their Cloud solution.

6. System Protection. To prevent compromise of systems which contain DSHS Data or through which that Data passes:

- a. Systems containing DSHS Data must have all security patches or hotfixes applied within 3 months of being made available.
- b. The Contractor will have a method of ensuring that the requisite patches and hotfixes have been applied within the required timeframes.
- c. Systems containing DSHS Data shall have an Anti-Malware application, if available, installed.
- d. Anti-Malware software shall be kept up to date. The product, its anti-virus engine, and any malware database the system uses, will be no more than one update behind current.

7. Data Segregation.

- a. DSHS Data must be segregated or otherwise distinguishable from non-DSHS data. This is to ensure that when no longer needed by the Contractor, all DSHS Data can be identified for return or destruction. It also aids in determining whether DSHS Data has or may have been compromised in the event of a security breach. As such, one or more of the following methods will be used for data segregation.
 - (1) DSHS Data will be kept on media (e.g. hard disk, optical disc, tape, etc.) which will contain no non-DSHS Data. And/or,
 - (2) DSHS Data will be stored in a logical container on electronic media, such as a partition or folder dedicated to DSHS Data. And/or,
 - (3) DSHS Data will be stored in a database which will contain no non-DSHS data. And/or,
 - (4) DSHS Data will be stored within a database and will be distinguishable from non-DSHS data by the value of a specific field or fields within database records.
 - (5) When stored as physical paper documents, DSHS Data will be physically segregated from non-DSHS data in a drawer, folder, or other container.
- b. When it is not feasible or practical to segregate DSHS Data from non-DSHS data, then both the DSHS Data and the non-DSHS data with which it is commingled must be protected as described in this exhibit.

8. Data Disposition. When the contracted work has been completed or when the Data is no longer needed, except as noted above in Section 5.b, Data shall be returned to DSHS or destroyed. Media on which Data may be stored and associated acceptable methods of destruction are as follows:

| | |
|------------------------|------------------------------|
| Data stored on: | Will be destroyed by: |
|------------------------|------------------------------|

Exhibit A – Data Security Requirements Exhibit

| | |
|--|---|
| Server or workstation hard disks, or Removable media (e.g. floppies, USB flash drives, portable hard disks) excluding optical discs | Using a “wipe” utility which will overwrite the Data at least three (3) times using either random or single character data, or Degaussing sufficiently to ensure that the Data cannot be reconstructed, or Physically destroying the disk |
| Paper documents with sensitive or Confidential Information | Recycling through a contracted firm, provided the contract with the recycler assures that the confidentiality of Data will be protected. |
| Paper documents containing Confidential Information requiring special handling (e.g. protected health information) | On-site shredding, pulping, or incineration |
| Optical discs (e.g. CDs or DVDs) | Incineration, shredding, or completely defacing the readable surface with a coarse abrasive |
| Magnetic tape | Degaussing, incinerating or crosscut shredding |

- 9. Notification of Compromise or Potential Compromise.** The compromise or potential compromise of DSHS shared Data must be reported to the DSHS Contact designated in the Contract within one (1) business day of discovery. If no DSHS Contact is designated in the Contract, then the notification must be reported to the DSHS Privacy Officer at dshsprivacyofficer@dshs.wa.gov. Contractor must also take actions to mitigate the risk of loss and comply with any notification or other requirements imposed by law or DSHS.
- 10. Data shared with Subcontractors.** If DSHS Data provided under this Contract is to be shared with a subcontractor, the Contract with the subcontractor must include all of the data security provisions within this Contract and within any amendments, attachments, or exhibits within this Contract. If the Contractor cannot protect the Data as articulated within this Contract, then the contract with the subcontractor must be submitted to the DSHS Contact specified for this contract for review and approval.
