

**Washington Department of Fish & Wildlife
Stillman Creek Chehalis Basin Early Action Reach (EAR) Restoration
Project No. LS:S231001:2019-1**

**Supplemental Q&A #2
5/23/2022**

Q: (Section 02370 Large Wood- Part B Contracting Agency will provide a portion of the quantity of Large Woody Materials)– Does this refer to section 01011 Owner furnished items?

A: Yes, the Owner will provide the Large Woody Materials listed in section 01011. The selected contractor will supply the slash and live cuttings from materials cleared on site.

Q: (Section 02370 Large Wood- Part C Remaining LWM quantities shall be supplied by the Contractor.) What are the specific quantities needed?

A: The logs, rootwad logs and piles are all supplied by Owner. Slash harvested from the clearing and grubbing of side channels and access routes shall be sufficient to pack voids per drawings.

Q: Can plans be issued in color?

A: No.

Q: What are the specific locations for the Large Wood Stockpile areas?

A: The logs, rootwad logs and piles for Phase 1 will be stockpiled in the locations shown in Supplement D – Large Wood Materials - Advanced Procurement. Phase 2 potential stockpile locations are shown on the Stillman Creek Chehalis Basin EAR Restoration Drawings.
