- 2) The Supplier shall provide Aramid Fiber conforming to the following requirements:

Kitsap County typically applies asphalt pavement overlays at an average of 300 ton per project/day. Due to small application quantities, it is anticipated that aramid fiber material will be applied by hand to the aggregate conveyor, at the appropriate dosage, just prior to entering the drum. We do not anticipate requiring an automatic feeder/delivery system. However, please provide bid costs for rental/lease of applicable automated feeders/delivery system in the applicable line item provided within the quote sheet.

- 4) Application of your product may require training and certification. If this is the case, please indicate the appropriate costs in the applicable line item provided within the quote sheet.
