

At Mortenson, we value diversity and are committed to involving small, minority, and women-owned business enterprise (SMWDBE) firms on all our projects. We are committed to supporting the growth of people and businesses in the communities in which we live, work, and serve. We develop project-specific plans aimed to maximize participation. We work hard to ensure our trade partners are safe and have a successful experience, so that we can grow together and continue to build on future opportunities. Mortenson's core procurement process is to maximize the inclusion of SMWDBE firms on all our projects.

New Arena at Seattle Center

Redevelopment of the New Arena at Seattle Center will transform a facility built originally for the 1962 Seattle World's Fair into a world class, state-of-the-art City jewel and destination. Located in the heart of Seattle's Uptown Neighborhood, the new venue will offer a truly unique and intimate experience for NHL, NBA, WNBA Seattle Storm, concerts and other entertainment events, while preserving the historic nature of Seattle Center and its surroundings. This project will be a complete renovation beneath its existing iconic roof that will remain in place. The work includes interior demolition, shoring and excavation to support lowering of the event level, improved viewing experiences, loading dock improvements, an access tunnel, landscape improvements, and a parking garage. **On the next page we have provided a brief snapshot of potential subcontractor opportunities on the New Arena at Seattle Center.**
